TO CORRESPONDENTS.

"*The Four o'Clock Movement.*"—We have received several communications on this subject, but cannot find space for any of them in our present number.

"*Smoky Chimneys.*"—Two or three parties claim the merit of having arranged a pot similar to that described by "H. C. T." last week. The matter is so simple that this may easily have occurred. We cannot go into the question of priority.

"*A. X.*"—We have not heard that the Committee of Leicester Cemetery Competition have purchased any of the other designs. Several competitors complain of bad treatment.

"*An Architect.*"—We have several classes of readers, and strive to serve all. The success which has attended our efforts to extend the circle of those who find matter to interest them in our pages would seem to prove that we take the right course.

"*Archd.*"—As to the roof of the public building in question, we are informed that no movement has occurred. The line of the curve is somewhat crippled in appearance, which has probably given rise to the impression.

"*X.*," "*D. D.*," "*F. L.*"—Ditto.

"*W. N., Jun.*"—All would depend on the understanding. As stated in the letter, the architect would seem clearly entitled to charge the tenant.

"*Holder of House Property.*"—If it be part of the builder's contract that he should produce the surveyor's certificate, he cannot recover the amount without doing so.

Received.—"Tempus" (The proposal to alter names of the hours has already appeared in THE BUILDER). "E. D." (Write to Dr. Potts, Buckingham-street, Adelphi, London). "W. B.," "Verax," "C. C. WALKER'S PATENT. — WARMING and VENTILATING WORKS, LOWER KING-STREET, MANCHESTER.

Established for the manufacture by machinery, of various descriptions of approved apparatus for warming and ventilating all kinds of buildings by STEAM, HOT-WATER, and WARM-AIR, and for the economical application of heat generally to manufacturing and domestic purposes.—The proprietor having been engaged for many years in an extensive practice of this art in various parts of the kingdom, and reduced it to certain and accurate rule, and feeling satisfied, from the frequency of failure in warming and ventilating, that there exists a field for the operations of properly qualified persons, is prepared to undertake works of this kind on the principle of guaranteeing any required temperature and stated amount of ventilation. Drying-rooms and stoves heated, where required, up to 200 deg. Fahrenheit, and drying operations generally planned and executed on improved principles. Having also bestowed much attention to reducing the expense and cumbersome nature of ventilating arrangements, he solicits public notice to the following highly useful, compact, and well-tried inventions:—

Walker's Patent HEAT-BOXES, Portable SELF-FEEDING BOILERS, improved SCREW-WARMING and VENTILATING MACHINES, HOT-WATER STOVES, TUBULAR and other WARM-AIR STOVES. Portable Steam-Engines of useful sizes, with cylindrical or tubular boilers.

Competent workmen sent to any part of the country. References to numbers of public institutions, churches, nobility and gentry architects, manufacturers, &c., throughout England Ireland Scotland, and Wales.

BURBIDGE and HEALY, 130, FLEET-STREET, LONDON, beg respectfully to inform the Building Public that they fit up COOKING ARRANGEMENTS for large Mansions, with patent appliances on scientific principles, which ensure greater economy and convenience than hitherto obtained. Also HOT WATER APPARATUS upon improved and scientific principles, which they recommend for its peculiar suitability for the Warming of Mansions, &c.

They fit up Laundries with Hot Water Apparatus, for Drying in a cleanly, expeditious, and safe manner. They also fit up BATHS with elegant arrangements, with every modern scientific improvement. Also Apparatus for the constant supply of Hot Water for Baths and general use of Mansions and large establishments.

PATENT SUSPENSION STOVES.—As a prevention against cholera, the Board of Health strenuously recommend "warmth and ventilation." For the attainment of this all-important object, the PATENT PORTABLE VENTILATING SUSPENSION STOVES were expressly invented. Thousands of them have been sold, and tens of thousands are now residing in the security and comfort which these stoves afford. Sizes suited for any situation, from the smallest bed room to the largest hall, from 12s. and upwards. In operation daily at GEORGE and JOHN DEANE'S, 46, King William-street, London-bridge. LIGHTERAGE.—To Contractors, Builders, Stone, Timber, and Slate Merchants, or others requiring Lighterage.—CHARLES STRETTON, Lighterman and Timber Master, having a large number of craft of all sizes, is ready to undertake large or small CONTRACTS at prices particularly advantageous to his employers.—24, Commercial-road, Lambeth (near Waterloo-bridge), and Tranmere-street, Bermondsey (near the Grand Surrey Canal).—BARGES LET on HIRE.

CLEANLINESS is necessarily at all times conducive to health, and this, as well as economy, is greatly promoted by substituting for the tedious process of painting with oil and white lead, STEPHENS'S DYES for STAINING Wainscot, as a SUBSTITUTE for PAINT, for decorating churches, large public rooms, and theatres, as well as private dwellings. When economy is of importance of material and time is of importance, these Dyes will be found of the greatest advantage, as they give a rich colour to plain woods, while they reflect all the beauty of the natural grain, which is an superior to imitations by art, and, at the same time, avoid the disagreeable smell and deleterious consequences of paint. The Dyes, or Stains, are prepared and sold by HENRY STEPHENS, 34, Bramford-street, Blackfriars-road, London, in bottles at 6d. and 1s. each, and at 8s. per gallon. The cask, Mahogany, [illegible] Wood Colours may be obtained in powder at 6s. per lb. Each dissolved in water to form the Dyed, and 1 lb. will make one gallon of stain.—N.B. The trade supplied.—Sold also at the office of "The Builder," 2, York-street, Covent Garden, London; at both which places may be had the proper Varnish and Size, with directions for their use.
